FURTHERMORE, TODAY’S DISCUSSION REVOLVES AROUND HYBRID CLOUD—WITH 74% OF ENTERPRISES POSSESsing A HYBRID STRATEGY—AND HOW CLOUD COMPUTING CAN BEST BE INTEGRATED WITH BIG DATA/ANALYTICS AND IOT INITIATIVES.

Cloud Expo is the single event in which delegates and technology vendors can meet to experience and discuss the entire world of the Cloud. It is also the world’s leading independent Cloud technology event—not a small hotel show or a diffuse vendor show oriented around entertainment. Cloud Expo is the one and only original, with a laser focus on the best speakers, content, and technology exhibition.

As Cloud Computing drives increasing percentages of enterprise IT budgets, it becomes paramount for technology vendors to reach their customers and prospects as effectively as possible.

Cloud Expo draws the most qualified customers and top prospects in New York City. They attend to learn about the growth of Cloud Computing, the emergence of Big Data/Analytics & the IoT, and how DevOps and WebRTC are impacting and accelerating this growth.
